* _____ would like to formally join the Australian Digital Theses (ADT) Program.

In joining, * _____ undertakes to abide by the conventions and standards required for submission and/or deposit of digital theses to the ADT Program. We understand that these conventions are necessary to maintain the integrity and quality of the distributed database [* enter name of institution].

Furthermore, as a participant we undertake to fully support the aims and philosophy of the ADT Program. These are:

- to establish a local program for the deposit and/or direct submission of digital theses,
- to promote this program locally,
- to actively engage in the university processes for the rules of submission to be changed in order to accept digital versions at least as an option,
- to work towards integration of the digital program with the normal processes and procedures as prescribed locally,
- to ensure where ever possible that the local digital theses be available for world wide release and
- to contribute to the maintenance of the project by sharing information, experiences and resources.

The ADT Program will make available an appropriate copy of the ADT deposit/submission software, instructions on installation and general setup support as required.

We look forward to working with the group in this unique Australian initiative.

Yours sincerely
